

DISCOVER THE  
TRUE LIFT™  
TECHNIQUE WITH  
RESTYLANE® LYFT™

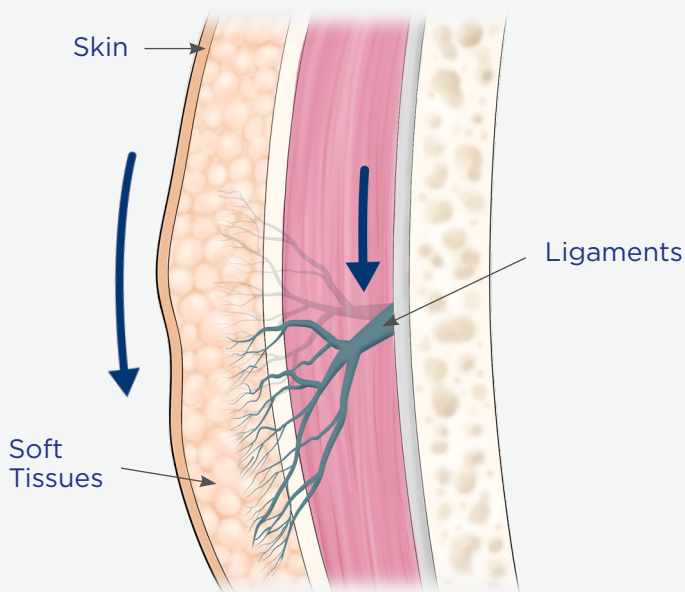

Restylane® LYFT

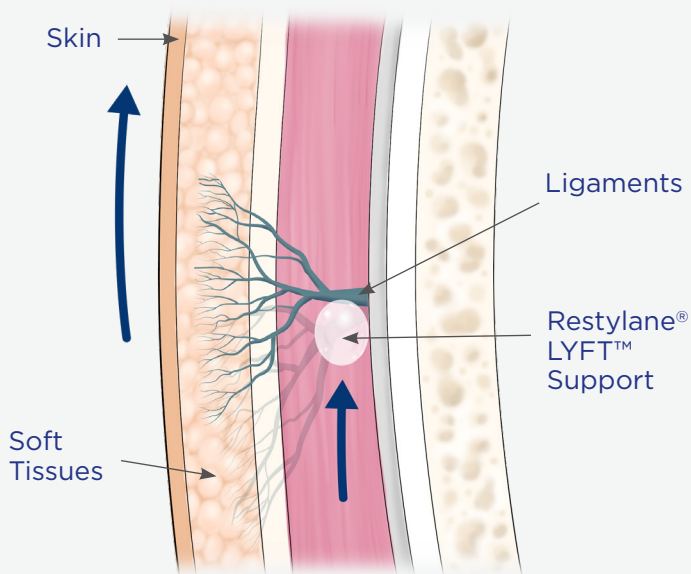

# IMMEDIATE AND NATURAL-LOOKING RESULTS

---

Ligaments are supporting tissues that connect your skin to bone. As you age, the ligaments in your face loosen which cause your skin to 'sag'.

True Lift™ is a non-surgical technique that supports the ligaments to give your face an instant lift.

**True Lift™ uses small injections of Restylane® LYFT™ to elevate eyebrows, define cheekbones, soften lines, lift the mouth, and define the jawline with 5 simple treatment points.**

---

**Ask your clinic about  
True Lift™ with Restylane  
LYFT™, the non-surgical  
technique that restores a more  
youthful appearance.**

---

Restylane® is a Prescription Medicine containing Hyaluronic acid 20 mg/mL. It is an injectable intradermal implant that is used for facial tissue augmentation and lip enhancement. Restylane has risk and benefits. Ask your doctor if Restylane® is right for you. Use strictly as directed. Tell your doctor if you experience any side effects. For further information ask your doctor. Normal doctor's charges apply. Restylane® is an unfunded treatment – charges apply.
